LeetCode

SUMMARY

CSE graduate (MAIT, 2026) with software engineering experience across backend services, system design, and applied AI, building REST APIs, caching layers, and RAG pipelines in Python/FastAPI. Solved 616+ LeetCode problems spanning Arrays, DP, Graphs, and Trees. Combines the discipline of a national-level athlete with hands-on experience shipping production-facing data and backend pipelines across two internships.

EDUCATION

Maharaja Agrasen Institute of Technology
B.Tech, Computer Science and Engineering

2022 - 2026
CGPA: 8.15

Darshan Academy Public School
XII- CBSE (92%), X- CBSE (92.4%)

2020 - 22

SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Backend & Systems: FastAPI, REST APIs, Streamlit, Model Context Protocol (MCP), MySQL, PostgreSQL, Redis, Docker, Git, Microservices Architecture

AI / ML / LLMs: LangChain, LangGraph, Hugging Face, Ollama, Claude API, Gemini API, OpenAI API, LLaMA-3, RAG Pipelines, FAISS, Vector Databases, TensorFlow, Keras, Scikit-learn, NLTK, OpenCV, Prompt Engineering, ReAct Agents

Tools: Jupyter, VS Code, Tableau, Power BI, Pandas, NumPy

INTERNSHIPS

Data and AI Intern
Ethara.ai

Remote, India
Feb 2026 - May 2026

- Engineered an automated Python application and a scalable Pandas/NumPy data pipeline for geospatial mapping, eliminating manual evaluation work and reducing data processing time by over 80%.
- Deployed an interactive Streamlit microservice for real-time statistical analysis, paired with automated PDF compliance reporting (Matplotlib, FPDF2), increasing reporting efficiency 3x.

Data Science Intern
Tamizhan Skills RISE

Remote, India
Jun 2025 - Jul 2025

- Architected and deployed 8 end-to-end predictive modeling pipelines across multiple sectors using Python, Pandas, and Scikit-learn, achieving 90%+ average model accuracy.
- Built an interactive academic analytics dashboard to visualize KPIs, accelerating data-driven decisions on complex datasets.

PROJECTS

URL Shortener: Full-Stack System Design Project

FastAPI · Redis

- Designed and built a full-stack URL shortener with FastAPI, PostgreSQL, and Redis, implementing collision-safe short-code generation and Pydantic-validated REST endpoints (POST /shorten, GET /{short_code}).
- Implemented a cache-aside caching layer in Redis with TTL-based expiration to serve repeat redirects without hitting PostgreSQL, and used HTTP 302 redirects to preserve accurate click tracking.
- Containerized all four services (FastAPI, Streamlit, PostgreSQL, Redis) with Docker Compose, including dependency health checks so the backend waits for its datastores to be ready.

AI Agent with MCP-Based Tool Integration

LangGraph · MCP

- Architected an autonomous AI agent using LangGraph and LangChain, integrating Model Context Protocol (MCP) servers for real-time external data retrieval.
- Built asynchronous execution workflows with AsyncIO for non-blocking task automation.

CERTIFICATIONS

- Oracle Analytics Cloud 2025 Professional: cloud data visualization, ML model deployment, and data modeling.
- Oracle Cloud Infrastructure 2025 AI Associate: OCI AI/ML portfolio, Generative AI, and LLM infrastructure.
- Machine Learning Specialization (Coursera, Andrew Ng): supervised/unsupervised learning and neural networks.

ACHIEVEMENTS

- National-level athlete: brings competitive discipline, time management, and consistency under pressure to technical work.
- 616+ problems solved on LeetCode across Arrays, Dynamic Programming, Graphs, Trees, and Strings.
